VOL. XI., NO. .60

FRESNO, CALIFORNIA, TUESDAY, MARCH 10, 1896

He Opposes the Cuban Reso Intions.

NO ACTION BY THE SENATE

Many Sepators Desire to be Heard on the Spanish-Cuban

Controversy.

Washington, March 9.—Another stir-ring chapter in the Spanish-Cuban con-troversy was added by the Senate today. enators indicated a desire to be on the subject, and the conference heard on the subject, and the content report accepting the house Cuban resolutions went over until tomorrow. In anticipation that a critical stage of the Cuban question would be reached today, the gallaries were besieged by the great owil seen since the session opened All of the public and reserved galleries were filled to overflowing with long lines of anxious people standing in the outer corridors auxious to gain admission corridors anxious to gain admission.
The diplomatic gallery was occupied by
Ambassador Patenotre of France, Ministers Mondones of Brazil, Hatch of Hawaii, Baron You Ketteler of the German
embassy, and members of the Chinese legation, and many of the secretaries attaches and members of the legation nouseholds. The bright costumes of the ladies of the diplomatic circle and the rich silken robes of the Chinese diplomats gave a teach of bright color

to the animated scene.

The speech of the day was made by Senator Hale of Maine, in vigorous opposition to this resolution and the offensive interference of the United States

position to this resolution and the offfensive interference of the United States
in foreign questions.

The senstor declared the spirit of
militarism was abroad in the land; that
our course involved the possibilities of
war with all its dreadful consequences.
Portions of President Grant's message
were read from the desk. Mr. Hale
said the insurgents now lighting in Ouba
had no legislature, no courts, no organization such as General Grant had set
fortil as absolutely requisition the recogintion of a state of war. Their power,
he said, is scated in straggling bands,
occupying straggling camps, and not
only have the insurgents not won a battle, but they have not had a fight
worthy of the name of a battle.

Mr. Hale compared the condition in
Spain with that in the south when the
confederacy was recognized. He said
the confederacy was a complete organization with that in the south when the
confederacy was recognized not executive brunches, established courts, a
formidable army and navy. And yet at
that time or state department, presided
over by Mr. Feward, urged and protested
to Buropean powers against even a limited recognition of the confederacy, and
always after incised on the resoinding
of that recognition.

"Did Spalm of Greened?" interjected

always after institled on the rescinding of that recognition.

"Bid Spain ever rescind?" interjected Mr. Bitchell of Gregon.
Mr. Hale said he was glad to hear this inquiry as it allowed an answer to those who seemed to think Spain was less friendly to us than other powers at the time of the civil war. No nation, declared Hale, had showed the friendly disposition that Spain had shown at that time. Never did she allow a British built privateer to stay in a Spanish port more than an hour. When such a privateer entered with American prisoners Spain secured their release.
Mr. Hale said the only explanation for the public and press clamor against Spain was that the country and congress had been falsely and mendaciously inficient with conditions which did not exist.
Mr. Hale referred to the statements

privates retard with Anerican prisoner Spain secured their release.

Mr. Hai and prese chance against Sysian was that the country and congress had been falsely and mendaciously influent with conditions which did not exist. Halo referred to the statements made by Mr. Sherman as to the atrocities committed by General Weyler. It had since been shown that there was an ingenious offer to fasten on the Spanian data of the statements and spanian statements. But these shiged overties were mendacious fabrications, firthin from beginning to end, and up we embody to distort public feeling.

But these shiged overties were mendacious fabrications of the statements of the statements of the statements of the statements of the statements. Which me one had anticipated and which for a time threw the senator into great accelement. Shift Hale said the once had made a stamment as to the internute representations against Spain. It was not surprising, in view of the attacks on Spain, that the minister had done that the statement to the clerk's deak to be read. It had hardly been begin when Seastor Daria of Minnesota arose and interrupted.

"It object," said far, transmitted to congress through the channels and reflecting the statement of the control of the statement of the s Mr. Frye suggested that Mr. Davis withdraw his point of order and allow the communication to be read, and that in reply the communication in the Washington Post of a prominent Collan (the secretary of the Chian legation in Washington) be read. The suggestion to also give the Chian elegation to also give the Chian elegation to give the Chian elegation to give the Chian elegation to the communication by the galleries so pronounced that Vier President Stevenson warned the spectators.

At 2 o'clock the unfinished business. At 2 o'clock the unfinished business the Dupont election case, was temporarily laid aside. Mr. Sherman, chairman of the foreign relations communities, gave notice that he would insist on action.

When the Spanish minister's communication had been read Mr. Morgan asked that the reply of the Lihan secretary of firmed.

the legation be read, but Mr. Hale declined, eaving it could be read in the time of some other senator. Continuing, Mr. Hale sent to the deak and had read a communication to the New York World from Dr. William Shaw Brown, a communication "not concocled in the organs of the insurrection," but written by a man "compelled to tell the truth" in a newspacer whose sympathies were

organs of the insurrection," but written by a man "compelled to tell the truth" in a nowspaper whose sympathies were with the insurgents, but which was broad enough to print both sides. The extract referred to Genural Weyler as a "greatly traduced man," who had been "greatly traduced man," who had been "igstenatically attacked" by the snemies of the Spanish cause. "Here," Hele continued, "are the exalting details in newspapers which sympathize with the insurgents. Liberty does not light its battles in that way, from burning lips, aye, from his own sehes, but not such horror and conflagration and davils' work. The heart stirred by the story of Bunker Hill turns with loathing from such taler as these. It is not war, but incendiarsm, destruction by the torch, murder and contrages. It is the wildest deeds of savegery. I will never vote to give aid and contort to leaders whose exploits are thus chronicled."

Out of it all, Mr. Hate said, he felt that the good sense of the American penels would assert itself, bringing peace rather than war.

Mr. Mills urged Mr. Sherman not to Oakhand, March 9. — Kate Anna Booth, aged 10 years, and Ida Emily Booth, aged 5, were run down at Eighth and Adeline etreets by an electric car at E. ple would assert itself, bringing peace rather than war.

Mr. Mills urged Mr. Sherman not to endeavor to reach a vote today as soveral senstors desired to be heard. Mr. Sher-man yielded to the suggestion and the Cuban resolutions went over.

Mr. Torpie was then recognized for an argument against the claim of Mr. Dupont to a seat in the senate from Delavare. passed over her head, crushing her skull in a frightful manner. The bones of her arms were broken and both legs Delaware.

pass, for it is not probable that even the
monometallists believed their own statement. Commenting on this appeal, the
Sacramento Bee has the following to

Sacramento Rec has the following to easy:

"Its it not time for the Republicans, not only of California, but of the entire Pacific Coast, to determine that they will be for once united; that their delegates shall be pledged beforehand that they will not work for any man as the Republican nomines for President, who will not pleake himself equarely and unequivocally upon the eide of silver? Let the coming Republican conventions of California, Oregon, Washington, Idahu, Nevada, Usah, Wyoming and Montans place in their platforms unmitstakable silver planks, and let their delegates be unequivocally pledged to vote for that man as Republican candidate for Treeddent who will promise to stand squarely upon such a plank. The Pacific Coast delegates may hold the balance of power. They may be able to dictate terms to the entire convention. They may heable to name the next President of the United States. Will they put their united shoulders to the whiel, or will they differ, divide, and become nonentities in the practice oast states pledge its delegates for McKinley, for Allison, for Reed, or for any other man, but let them unitedly instruct their delegates to vote for fast iright. The Ret is right. The Republicans of the Pacific coast (and of all states that believe in Unitedlians as well) should stand united in the approaching struggle. That the friends of the single gold standard will push that issue, almost to the exclusion of othern, already is suffi-

standard will push that issue, almost to the exclusion of others, already is suffi-ciently clear. Their plan of action is made evident in the appeal of the chamber of commerce. It is to explure both of the old parties for their tenet. Let them do what they will with the Demo-eratic party, which, under the leadership of Grover Cleveland has fought the Dat-

and instruct their deligates of the man thonal convention to vote for the man who will stand on such a plank, and they may hope to exercise much inflo-ence in the convention. Without some such action, the silver sentiment all about us might as well be pulseless and

The action of the New York Chamber The action of the New York Chamber of Commerce should serve as a bugle call, not alone to single-standard men, but to their opponents as well. The issue is too momentous to be supinely surrendered to the goldbug hook-merely because they have the power of an administration and of Wall Street on their side. As the Represence where the metaside. As the REPUBLICAN views the matter, the issue is well nigh vital to the party. It certainly is very questionable if any party that indoress Grover Cleve-land's views can carry the Pacific states. The thought is not pleasing, but it will not down. The silver states should make their opposition to monometallism felt, and they best can do it along the lines which the Bec suggests.

AMONG OUR EXCHANGES.

Stockton, which until three weeks ago never had had a paper published on seven days in the week, now has two. Two or three weeks ago the Record took this step by beginning the issue of a morning paper, and now Independent bas followed suit. The latter journal is soon to be enlarged. It is a notable fact that Stockton is decidedly

The New York Chamber of Commerce has issued an appeal to "the commercial bodies and business me of the United States," from which we extract the following, as indicative of the tenor of the whole:

"Therefore, we ask all citizens to unite in vigorous effort to urge the selection of diegrates to the political conventions of body me at parties who will advocate plear and distinct platform utterances in a rold standard of value. The time is short and action ought, therefore, to be all the more prompt."

If the cause of silver is as dead as our goldbug' friends repeatedly have said that it is, this appears to be a strange stituted for the New York Chamber of Commerce to assume. But let that

Gas the Chenpeat.

By using the new Welsback gas lamp over the old-tyle 4-foot tip with gas at \$2 per 1000 feet, as they consume about one-half the gas and give four times the light the old tip does. Five Welsback lamps will give as much light in a stores twenty 16-candle power electric lamps. At Portland, Oregon, and Sacramento, Cal., where both electric plants are being run by water power, gas is being sold at \$2.55 at Portland and \$2.59 at Sacramento, and is competing successfully with electricity. Retain your Welsback lemps and have a strong bright light for the least money. Whenever electricity gets as cheap as gas, at \$2 per 1000 feet, then some means will be adopted to furnish gas cheaper.

RANDOM REMARKS.

The Stockton Mail suggests that Col. II. G. Otis of the Los Angeles Times, who was mentioned for Vice President, is better qualified to be secretary of agriculture. We move to smead the amendment by making it read secretary of war. Does the Mail know Colonel Otis?

Mrs. Cooper is "protecting" Mrs. Stockton, Person Brown is "protecting" Miss Overmen, and Sheriff Whelan is "protecting" Mrs. Davidson. Some one should step in and "protect" Mr. Brown for a while, at least."—Hollister Free Lance.

Did the Free Lance over hear a proverb about the devil looking after his own? Well

three years, but the Republicans of the west who care for their party owe is to the party to see, as best they may, that it is not made a right wing of Clerelandism.

The opposition to Olevelandism, Wall
Streetism, monometallism—call it what you will—can best be expressed in the manner which the Rec suggests, for thus only can it be made formidable. Let the conventions in states favorable to silver (and they include all the West) adopt silver planks in their platforms and instruct their delegates to the national convention.

The Best is Always by Far the Chespeat.

That old but trite saying that "the best is the chespest" is true when applied to any line of business. But its importance and force are felt more in the line of drug and olicenicals than in respect to any alber commodity.

The absolute increasity of good, pure, wholesoune drugs in cases of sickness is so apparent that no chances should be taken in an attempt to save a few cents on the price of an article.

Our leading druggists, Buker & Colson, are selling goods as chesply as they can be bught any where, quality and purity considered.

When you attempt to get drugs chesper than their figures you are in danger of getting an inferior article. Bear this in mind when buying medicines or having prescriptions filled. A Hard Row of Stumps.

At the Contral school 106 scholars were absent out of a regular enrollment of about 375. At Park Avenue there was an attendance of about seventy-live per cent. At all the achools several additional pupils came in during the noon hour, the parsue having been in doubt in the morning about conding them.

The school premises were all thoroughly foundated during the past week, and as there have been no cases of diphthesis reported of late, the Board of Education does not think there is any reason for Keeping the schools closed. They are naturally as anzious about the welfers of the Scholars as anybody is, and should there be only cause for lear they would adjourn the schools to inediately. Every teacher in the city was present at the called meeting. Professor Henton tated the aution of the board, and for the welfare of the schools he urged that the teachers and principals work harmonionly. He said that the Board of Education is at present formulating rules to govern principals and teachers. They will probably be ready in a Yew day other school matters, it was developed that the teachers are strongly inclined to demand pay for last week. A question was mised as to whether or not the week should be recorded as a completion of the school month, it happening to be the fourth week ince the month's record was becaus. It appeared to be the sentiment of the mejority of the teachers to conder it as the completion of the month.

Few event have occurred in the history of Fream excalling so many pleasant and so many pathetic memories as the fall of that pole. It went up as Grover Glevaland went up to the White House. It is all as he is about to come down from the White House. Rev. Johason 1s Received With

Although Dr. Johnson suffered all day Saturday with a severe headache, and was consequently much weakened for the work, he fully met and even surpassed all expectations of him. He preached in the murning on "Holy thost hapthem" and urged all believers to seek this divine blessing. He outdetly is not here to assault this dioctrines, worship and usages of other denominations, but to preach the gapel. He is somewhat peculiar and dramatic in manner. He is witty and funnay, and at the same time carnest and pointed, so that his audience is convolved with the same time.

He has no pink at other denomination.

THE SAFE HAS COME.

Money.

The supervisors had a full board presant yeaterday when they met at 2 o'clock. They gave nearly all the after-mon to the consideration of bills.

The new safe purchased for the treas-uter's office has arrived, and a man has been tent here to set it up. The board yesterday visited the treasurer's office in company with the agent and with Treas-urer Whitson, and decided how and where they would have it placed. Treas-urer Whitson had only one suggestion to offer and one request to mase; that was that the safe be so arranged that robbers could not show him into it and lock the door. He has a well-grounded horror of being bolted in a safe, and he wants to take no chances on that sorre. The safe will be so set up that a man cannot be pushed in it, and it will be almost impossible for burglars to break it open.

AN OLD PLAN REVIVED. An Example of History Repeating Itself.

Entror Republican :-- As competition as been the reinstion, so co-operation s the only salvation of the raisin in-

dustry.

About six years ago when the agitation of the raisin question first began in narnest, at a large public meeting hold at Frenon, five fruit and tee raisin growners, who are a committee, and all the racease are invested a committee, and all the racease are invited to confer with the racease are invested as plan of co-operation, embraging the interests of growers and packers nike.

The plan provided for a union composed of growers only, and also for an organization of packers, and both of these associations to be represented upon a board of control whose business it should be to market the whole crop of the State.

The plan went into details how to deliver the crop at the packing houses, how to grado, pack, inspect, frand, slip, sell and distribute the raisins throughout the United States; how the funds were to be raised to defray expenses and how to remit the money (realized from sales) to the growers, and how these three co-operative organizations were to be governed, and their officers and managors and their duties were siso provided for in this plan.

Instead of adopting this plan, other infinences prevailed and the so-called "Bond of Honor Plan" was adopted against the earnest protest, and warning of the writer that it in no way would settle the raisin market in a worse condition than ever before.

Since then several combines have been formed, tried and found wanting, and the said ontooms of them all has been like the "Bond of Honor Plan," dismut failures.

Why? Because all worn "inited unions" of growers and mackers, two elelustry.
About six years ago when the agita-

the sail outcome of them all has been like the "Bond of Honor Plan," dismal failures.

Why? Because all wore "mixed unions" of growers and packers, two elements warring against each other with no cohesive principle. "A house divided against itself cannot stand." The plan presented at the time mentioned obvinced all this, but clearly provided for a harmonions, co-operative government of each organization, based upon just business principles, and with well-defined duties, rights, privileges and penalties for violations of roles. If this plan had been adopted and lonestly carried out, every industrious raisin grower would today be prosperous and happy, and Fresus would be making rapid strides toward her wished for 100,000 inhabitants.

But it is never too late to mend, and it in encouraging to see that some of the features proposed in that plan are now the watchword. It is to be hoped that the good work may go on. The action taken by the Hundred Thousand Club is certainly appreciated.

We should all come together in a fraternal spirit and work along the lines of co-operation.
